ABOUT INMEDIAS RES

since 2003

We at Inmedias Res OÜ are an Estonian family based company established in 2003, in the town of Tartu, Estonia. Our expertise is focused on providing a range of timber products:

- Sawn Timber import-export
- Timber buildings manufacturing
- Wood processing
- Thermowood (Thermally modified wood)
- Firewood production

We focus on providing high quality affordable products, with a lot of detail on design to fit our various export markets. Our timber buildings are designed with our customers in mind. Offering a range of products suitable for people's gardens, along with a wide range of outdoor leisure buildings and glamping solutions. At the heart of our business is offering strong customer service and support through-out the complete process.

More than 90% of our production goes to export. Our main partners in Europe are Nordic countries, United Kingdom, Germany and Netherlands. Outside of Europe our products are sold in U.S, South-Korea, New-Zealand and Australia.

Our priority is offering unparalleled quality. Since we control the chain from Sawn timber supply to the final building that we manufacture, enabling us to ensure, that only the best quality materials are used.

In Timber supply we value the Environment and are FSC certified. We make sure that our wood comes from responsibly managed forests and is renewable.

In our product range, we try to offer as broad a range as possible to create a one stop shop of timber products. This makes it easy and convenient for our customers to get a quality product from a reliable partner. Alongside our standard brochure models, we're able to offer a bespoke garden building service, buildings made to measure to our customers specifications.

In our product development we are guided by innovation. We continually analyse trends in the market, and listen to what our customers are looking for, and offer solutions for every aspect of outdoor living. Every year we come out with new designs and ideas to give our partners an advantage against competition.

Please do not hesitate to contact us with all your enquiries,

Yours,
Inmedias Res

Technical drawing of a staircase layout. The drawing shows a rectangular area with dimensions 2340 (width) and 2490 (height). The width is divided into 175, 1990, and 175. The height is divided into 400, 600, and 175. The staircase is shown with a landing area of 1785 and a flight area of 170. The landing area is divided into 820, 700, and 820. The flight area is divided into 460 and 70. The drawing includes a section line '1-1' and a dimension of 600 for the landing area.
